

**JEMS**

Adjustable rigid one-piece collar

The central part has a leaf of polyethylene with areas of support padded and covered with orange leatherette. By means of a special fixing system using self-adherent strips, it is possible to adjust the collar in both vertical and horizontal directions thus allowing for adaptation to all patients. The materials used in the construction make it not only X-ray compatible but also strong. It is suitable for use in extrication and for rehabilitation. Jems is washable with detergent or disinfected. It is easily compressed, thus reducing the amount of space needed for storage.

**TECHNICAL DATA**

Dimensions A: 100 mm  
B: 545 mm  
C: 95 mm  
D: 295 mm

Material LDPE  
Weight 82 g  
Closure Strap

QC50103A
