

**JEMS**

Adjustable rigid one-piece collar

The central part has a leaf of polyethylene with areas of support padded and covered with orange leatherette. By means of a special fixing system using self-adherent strips, it is possible to adjust the collar in both vertical and horizontal directions thus allowing for adaptation to all patients. The materials used in the construction make it not only X-ray compatible but also strong. It is suitable for use in extrication and for rehabilitation. Jems is washable with detergent or disinfected. It is easily compressed, thus reducing the amount of space needed for storage.

**TECHNICAL DATA**

Dimensions	A: 110 mm
	B: 585 mm
	C: 110 mm
	D: 345 mm
Material	LDPE
Weight	97 g
Closure	Strap
